The author wishes to acknowledge the helpful contributions of the following consultants in the preparation of this book:

Edna M. Black  
Science Teacher  
Manalapan High School, Englishtown, NJ

Ed Braddy  
Science Teacher  
J. W. Mitchell High School, Pasco, FL

Gertrude Karabas  
Assistant Principal, Curriculum & Instruction  
Teaneck High School, Teaneck, NJ

Lynne Popper  
Biology and Marine Science Teacher  
Newtown High School, Queens, NY

Amelia Quillen  
Biology and Oceanography Teacher  
Smyrna High School, Smyrna, DE

Carl M. Raab  
Former Director of Academic Initiatives  
New York City Board of Education, NY

Jeffrey Schley  
Marine Science Teacher  
Elsinore High School, Wildomar, CA

Suzanne Tansey  
Science Teacher  
John Ehret High School, Marrero, LA

Tim Tindol  
Former Marine Science Teacher  
Mission High School, San Francisco, CA

Robert Zottoli, Ph.D.  
Professor of Biology  
Fitchburg State College, Fitchburg, MA
You live on land, but most of Earth is covered with water. Water is everywhere. Look at any photograph of Earth taken from space. A color photograph will show that our planet is mostly blue—the color of the ocean. How much of the world is actually covered by ocean? Close your eyes in front of a globe of the Earth. Spin the globe. When it stops spinning, touch the globe’s surface. Odds are you will put your finger on a part of Earth’s ocean. In fact, about 70 percent of Earth’s surface is ocean.

How deep is the sea? Why is it salty? Do strange creatures really live in the deepest parts of the sea? These questions, and many others, may come to mind when you think about the ocean. Today, we can answer many of these questions thanks to the work of oceanographers, scientists who study the sea. However, we cannot answer every question. Scientists continue to study the ocean, so that we can understand more of its mysteries.

In the first unit of Marine Science, Second Edition, you will be introduced to the history and methodology of the study of the ocean and to the great variety of marine environments. The next three units concentrate on life in the sea—the branch of science called marine biology. The fifth and sixth units deal primarily with the science of oceanography, the study of the physical geology characteristics of the sea. In fact, oceanography is a mix of many areas of scientific study, including biology, chemistry, geology, and physics. Together, marine biology and oceanography make up the body of knowledge known as marine science. In the last unit of this textbook, you will explore how the physical and biological characteristics of the ocean interact to affect marine ecology.

At the end of each chapter, you will find a Chapter Review section that includes question sets and a suggestion for a research project or activity. The question sets help you review the material you have learned. The research projects or activities help you expand your knowledge and understanding of marine biology and oceanography. You will find that doing a research project can be a challenging and creative endeavor, often one that will help you to think like a scientist. You will ask questions, make observations, develop explanations, and draw conclusions. We hope you enjoy doing these projects. Now, let us begin our exploration of the marine world.
## Contents

**To the Student**

### UNIT 1
**INTRODUCTION TO MARINE SCIENCE**

1. **Exploring the Oceans**
   - The “Unsinkable” Ship / Voyages of Discovery / Scientific Exploration / Exploring Inner Space / Finding the Titanic
   - Discovery: A Highway for Cultural Dispersion
   - Laboratory Investigation: Making Ocean Water

2. **Marine Scientists at Work**
   - Marine Science Today / The Scientific Method / Scientific Measurements / Viewing the Microscopic World
   - Research: How to Set up a Marine Aquarium
   - Laboratory Investigation: Measuring Snail Speed

3. **Marine Environments**
   - Marine Life Zones / The Sandy Beach Environment / The Rocky Coast Environment / The Estuary Environment / The Coral Reef Environment
   - Discovery: Biodiversity Among the Benthos
   - Laboratory Investigation: Examining Beach Sand

### UNIT 2
**KINGDOMS OF LIFE IN THE SEA**

4. **Unicellular Marine Organisms**
   - Classification / Bacteria/Diatoms/Dinoflagellates / Nutrition in Algae
   - Environment: Red Tides and Muddy Waters
   - Laboratory Investigation: How Diatoms Perform Their Life Functions
5  Marine Algae and Plants  117
MARINE ALGAE/ BEACH PLANTS/ MARINE GRASSES/ MANGROVE TREES
ENVIRONMENT: Caulerpa—The Plantlike Pest
LABORATORY INVESTIGATION: Adaptations of a Marine Alga

6  Simple Marine Animals  141
NUTRITION IN ANIMALS/ ZOOPLANKTON IN THE SEA/
PROTOZOANS/ SPONGES, ROTIFERS, AND BRYOZOANS
DISCOVERY: A Challenge to Taxonomy
LABORATORY INVESTIGATION: Observing Diverse Zooplankton

UNIT 3
MARINE INVERTEBRATES

7  Cnidarians  172
JELLYFISH/ SEA ANEMONES/ CORALS/ HYDROIDS
ENVIRONMENT: Floating Beauties, Stinging Beasts
LABORATORY INVESTIGATION: Observing Stinging Tentacles

8  Marine Worms  193
FLATWORMS AND RIBBON WORMS/ ROUNDWORMS AND SEGMENTED WORMS/
GIANT TUBE WORMS AND ARROW WORMS
DISCOVERY: The Cells of C. Elegans
LABORATORY INVESTIGATION: Adaptations of the Sandworm

9  Mollusks  213
BIVALVES/ GASTROPODS/ CEPHALOPODS/ OTHER MOLLUSKS
RESEARCH: The Smartest Invertebrate
LABORATORY INVESTIGATION: Feeding in a Bivalve
10 **Crustaceans** 236
INTRODUCTION TO CRUSTACEANS: THE LOBSTER/ANOTHER IMPORTANT CRUSTACEAN: THE CRAB/DIVERSITY AMONG CRUSTACEANS: THE SHRIMP AND OTHERS/DIVERSITY AMONG THE ARTHROPODS

**RESEARCH:** Sticking with the Barnacle
**LABORATORY INVESTIGATION:** Adaptations of Crabs

11 **Echinoderms** 259
STARS IN THE SEA/ADAPTATIONS IN THE SEA STAR/SEA URCHINS AND SAND DOLLARS/ECCENTRIC ECHINODERMS

**CONSERVATION:** In a “Pickle” over the Sea Cucumber
**LABORATORY INVESTIGATION:** Adaptations of Sea Stars

**UNIT 4**
**MARINE VERTEBRATES**

12 **Marine Fishes** 280
PROTOCHORDATES AND JAWLESS FISHES/CARTILAGINOUS FISHES/BONY FISHES/UNUSUAL ADAPTATIONS IN FISH

**CONSERVATION:** Shark Attack!
**LABORATORY INVESTIGATION:** Breathing and Transport in a Fish

13 **Marine Reptiles and Birds** 308
MARINE REPTILES/MARINE BIRDS

**TECHNOLOGY:** Satellite Tracking and Sea Turtles
**LABORATORY INVESTIGATION:** Adaptive Features of Marine Reptiles and Birds

14 **Marine Mammals** 330
CETACEANS: WHALES AND DOLPHINS/WHALE ADAPTATIONS AND BEHAVIORS/SEALS AND OTHER MARINE MAMMALS/THE DIVING RESPONSE

**RESEARCH:** The Migrating Manatee
**LABORATORY INVESTIGATION:** Diving Response in Humans
UNIT 5
THE WATER PLANET

15 The World of Water 360
THE WATER PLANET / THE WATER BUDGET / WATER AS A SOLVENT / THE SALTY SEA
ENVIRONMENT: A Beacon on a Vanishing Beach
LABORATORY INVESTIGATION: Determining Seawater Salinity

16 Geology of the Ocean 384
ORIGIN OF THE OCEAN AND THE CONTINENTS / THE THEORY OF PLATE TECTONICS / OCEAN FLOOR TOPOGRAPHY / COASTS AND REEFS IN PROFILE
TECHNOLOGY: Loihi on the Rise
LABORATORY INVESTIGATION: Getting Water from a “Stone”

17 Climate and the Ocean 415
OCEAN TEMPERATURE AND WIND / MOISTURE IN THE AIR / STORMY WEATHER / THE GREENHOUSE EFFECT
ENVIRONMENT: Rising Temperatures, Rising Sea Level
LABORATORY INVESTIGATION: Analyzing Ocean Temperatures

UNIT 6
ENERGY IN THE OCEAN

18 Temperature and Pressure 442
KINETIC ENERGY AND HEAT IN THE OCEAN / TEMPERATURE VARIATIONS IN THE OCEAN / PRESSURE UNDERWATER / OSMOTIC PRESSURE AND AQUATIC ADAPTATIONS
CONSERVATION: Keeping the Chinook Chilly
LABORATORY INVESTIGATION: Effects of Temperature and Salinity on Water Density

19 Light and Sound in the Sea 466
LIGHT AND WATER / LIGHT AND LIFE IN THE SEA / SOUND IN THE SEA
TECHNOLOGY: Sound Surveillance in the Sea
LABORATORY INVESTIGATION: Identifying Pigments in Algae
UNIT 7
MARINE ECOLOGY

20 Tides, Waves, and Currents 485
THE TIDES/ OCEAN WAVES/ OCEAN CURRENTS

RECREATION: The Science of Surfing
LABORATORY INVESTIGATION: Measuring Ocean Waves

21 Interdependence in the Sea 514
CYCLES IN THE SEA/ FOOD RELATIONSHIPS IN THE SEA/ SYMBIOSIS IN THE SEA/ SUCCESSION IN MARINE ENVIRONMENTS

ENVIRONMENT: Turf Wars off Fisherman’s Wharf
LABORATORY INVESTIGATION: Observing How a Barnacle Filter Feeds

22 Pollution in the Ocean 541
SEWAGE POLLUTION / TOXIC CHEMICALS/ CLEAN, CLEAR WATERS/ LITTER IN THE WATER

ENVIRONMENT: Swimming with the Fishes
LABORATORY INVESTIGATION: Determining the pH of Water Samples

23 Conservation of Resources 569
MARINE RESOURCES/ FARMING THE SEA/ PROTECTING MARINE ANIMALS

CONSERVATION: Rough Times for the Orange Roughy
LABORATORY INVESTIGATION: Analyzing Fishery Data
